

Charging paddle, similar in size sits directly over implanted battery.

---

---

---

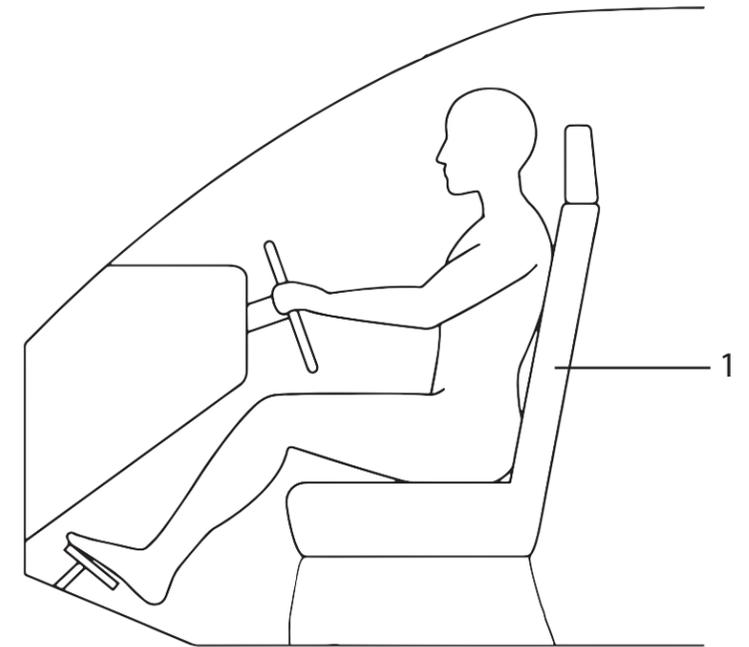

Larger pad would enable better charging area and ease of movement due to constant charging being a lifelong commitment.

---

---

---

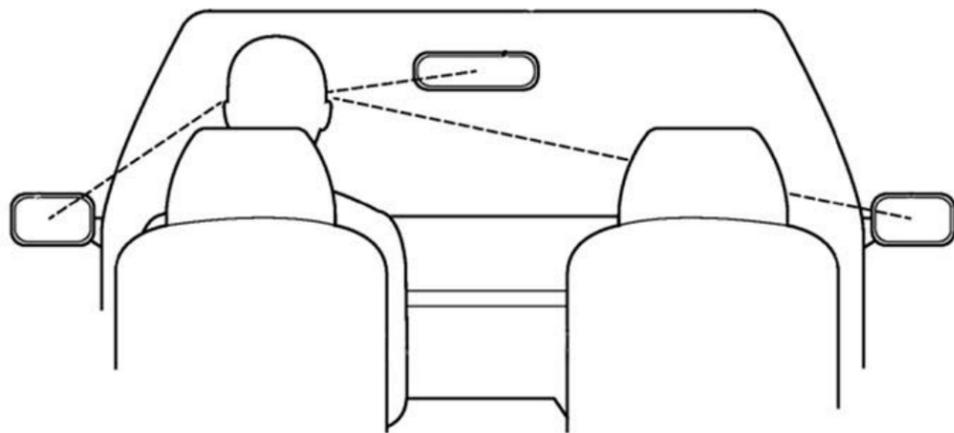

Number 1, area to locate improved charging pad for added charging convenience while commuting.

---

---

---

It would not have any interference with driving since the car would be equipped for driving and maneuvering itself.

---

---

---

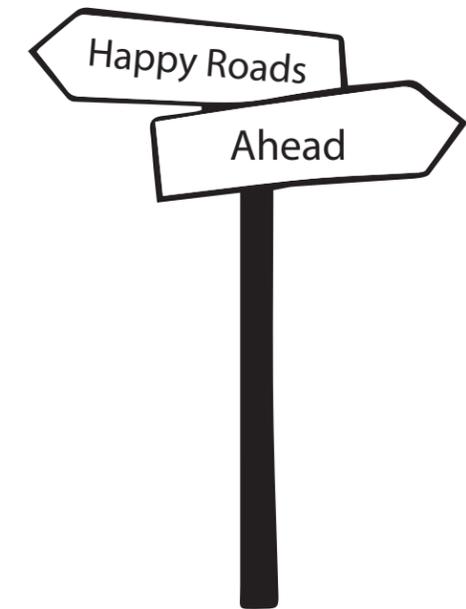

Happy car = happy driver!
